

POULTRY REPORTS GRAPEFINDING

Following is Superintendent Pearson's report for Macleod Utilities operation for 1921, period of which will doubtless prove very satisfactory to Macleod ratepayers:

Macleod, February 18th, 1922
To the Mayor and Council,
Town of Macleod.

Gentlemen:—
I have pleasure in presenting my report for the year 1921.

Power Plant

Very early in the year further moves were made to reduce the operating expenses of the Power Plant by the installation of an engine driven pump and generator for emergency service. This scheme was approved by the Council on January 31st. The machinery was purchased and installed and tested out on April 22nd. The standby boiler was put in commission on the first of May and has not been used since for Power purposes. This installation has proved a success in every way. It has handled all the work of the plant and has reduced the expense of operation as expected, that is about \$10,000 per annum. The plant has been put in the position of putting the plant on a paying basis.

The large gas engine installed the previous year successfully carried the load during the entire year, with an output of less than \$5,000 and continues to give splendid service. During the year an additional \$5,000 insurance was taken out on the plant making a total now in force of \$15,000.

Waterworks

Efforts to reduce the water leakage from the mains were very successful, about thirty leaks of various sizes were repaired with the result that the water pumpage has decreased about 200,000 gallons. However, there remains a considerable amount of work to be done in this direction before the water consumption is down to normal.

The filtering system was comparatively new but river conditions were not very bad at any time, consequently it was able to take in all the water at a moderate cost.

At the low water period in the late fall efforts were made to remove old water intake in the river bed. This work was successfully carried out and the repairs then the water consumption was put in a very satisfactory condition.

Apart from the remaining leaks and some needed repairs to one of the large wells at the plant the water supply system is in excellent condition. With the repairing of a large number of leaks in the past two years the installation of the new pump last spring and the repairing of the original turbine pump it is possible to keep the water low at all times. The plant now has a pumping capacity of 2,000 gallons per minute and the town pumps have three means of driving them.

In June the C.P.R. water contract expired and after some negotiation with the company a new contract was entered into to supply water to the plant for one thousand gallons in place of the old rate of 54 cents.

Electric Light

Very little work was carried out during the year on the distribution system, this work has been left over on account of the fact that although it is highly desirable that the system should be safe and efficient no direct profit will accrue from the work. It is hoped that some reconstruction work will be carried on during 1922.

Financial and Statistical

The most important part of the year's work was the financial. After all, our engineering schemes are only a means to an end, and the end is the public service at a reasonable cost and in doing so maintain the plant in good condition without incurring any loss. I am glad to be able to report that the end of the year's utilities in this happy condition. The Auditor's statement shows a surplus of \$10,000.

This amount has of course been invested in the plant in such a manner as it is bringing back the rate.

It is hoped that in this coming year that the necessary repairs and replacement work on the electrical distribution system and waterworks will be carried out from the current revenue.

The number of electric light consumers at December 31st, was 412 as compared with 435 in 1920, water consumers 310 as against 312 a year ago. The revenue from electric light was 70 less than last year, water 22,000 higher, this increase was increased rate to the C.P.R. for water being left over from the year for lawn and

wing figures show in contact has been accomplished. The figures represent the operation account, this

covers fuel, wages, oil and supplies:

1919	\$23,000
1920	\$28,000
1921	\$25,000

This shows a net saving in two years of \$25,000.

In view of the fact that the total cost of all the new machinery and installation costs was \$25,000, I feel that the changes made have been more than satisfactory.

I am happy to be able to report that at the end of writing all notes have been taken up and that the \$25,000 referred to above has been wholly paid, no further debt remains on the plant equipment.

Respectfully submitted,
VERNON FRANKSON,
Supt. of Utilities.

Exciting Man Hunt

An exciting man hunt, in which town police, mounted police, and civilians also took an active part, was made to the north of the town, that early in the morning a man named Dave Hutton, realizing that he had been taken up and that the \$25,000 referred to above had been wholly paid, no further debt remains on the plant equipment.

At these meetings lectures are being given on matters of poultry and agriculture. The first of these lectures was given by Mr. J. H. Hutton and was on the subject of poultry keeping. It was a very interesting and instructive lecture, illustrating methods of handling, feeding, and breeding of poultry.

Grand Prairie citizens will vote on the establishment of a municipal hospital. The High River municipal hospital has been opened at a cost of \$15,000. The district has recently accepted a hand some new hospital building.

Cases To Come Before Criminal Supreme Court

At the forthcoming sittings of the Criminal Supreme Court before Justice Ives there will be tried, commencing on the 12th inst., the following list of cases:

1. Rex vs. Harry Walker: Charge of assault with a dangerous weapon.
2. Rex vs. Kong Wong: Fabrication of evidence with intent to mislead the court.
3. Rex vs. Harold Clifford: Forgery of a check.
4. Rex vs. Louis Campanaro: Attempting to corrupt police officer.
5. Rex vs. Kelly: Offence against young girl.
6. Rex vs. Robert Stankin: Two charges of breaking and entering.
7. Rex vs. William Smith: Theft.
8. Rex vs. Wesley Johnson: Retaining stolen goods.
9. Rex vs. George Parker: Misappropriation of money.
10. Rex vs. W. C. Miller: Interfering with witnesses.
11. Rex vs. J. L. Fawcett: Retaining stolen goods.
12. Rex vs. J. L. Fawcett: Retaining stolen goods.
13. Rex vs. J. L. Fawcett: Retaining stolen goods.
14. Rex vs. J. L. Fawcett: Retaining stolen goods.
15. Rex vs. J. L. Fawcett: Retaining stolen goods.
16. Rex vs. J. L. Fawcett: Retaining stolen goods.
17. Rex vs. J. L. Fawcett: Retaining stolen goods.
18. Rex vs. J. L. Fawcett: Retaining stolen goods.
19. Rex vs. J. L. Fawcett: Retaining stolen goods.
20. Rex vs. J. L. Fawcett: Retaining stolen goods.

Bright Municipal Election Results

The Bright Municipal District election of 1921 has resulted as follows: Division No. 1, T. K. Murphy was elected by acclamation; Division No. 2, John Maloney was returned winning over T. Bailey, who has held office for the past two years.

Councillor T. E. Murphy has served continuously for ten years. It looks as though he will continue to serve for many more years.

Members of the cabinet last week met a delegation from the G.W.A. to discuss the matter of the association last year some \$50,000 being granted to the association.

Mr. Greenfield held the delegates that the provincials not financially

CAPITAL AND PRODUCTION

Farmers in the province are talking more intelligently ever before of poultry raising, according to J. H. Hutton, Poultry Commissioner of the Province, who has been holding poultry meetings at several points in the South, in company with Mr. Shackleton, manager of the government poultry plant. Mr. Hutton states that the meetings he has held have been very successful.

Further series of these meetings branches of diversified farming have been arranged by the Department of Agriculture to be held on the C. & K. line south of Red Deer, and also in the Corcoran district. These meetings will be held as follows:

Creswell,	March 6th
Olds,	" 7th
Didsbury,	" 8th
Infinit,	" 9th
Red Deer,	" 10th
Coronation,	" 21st
Harvey, (8:30 p.m.),	" 21st
Conort,	" 22nd
Medley,	" 23rd
Gustay,	" 24th

At these meetings lectures are being given on matters of poultry and agriculture. The first of these lectures was given by Mr. J. H. Hutton and was on the subject of poultry keeping.

Grand Prairie citizens will vote on the establishment of a municipal hospital. The High River municipal hospital has been opened at a cost of \$15,000.

The district has recently accepted a hand some new hospital building.

At the forthcoming sittings of the Criminal Supreme Court before Justice Ives there will be tried, commencing on the 12th inst., the following list of cases:

1. Rex vs. Harry Walker: Charge of assault with a dangerous weapon.
2. Rex vs. Kong Wong: Fabrication of evidence with intent to mislead the court.

12. Rex vs. J. L. Fawcett: Retaining stolen goods.
13. Rex vs. J. L. Fawcett: Retaining stolen goods.
14. Rex vs. J. L. Fawcett: Retaining stolen goods.
15. Rex vs. J. L. Fawcett: Retaining stolen goods.
16. Rex vs. J. L. Fawcett: Retaining stolen goods.
17. Rex vs. J. L. Fawcett: Retaining stolen goods.
18. Rex vs. J. L. Fawcett: Retaining stolen goods.
19. Rex vs. J. L. Fawcett: Retaining stolen goods.
20. Rex vs. J. L. Fawcett: Retaining stolen goods.

Coal Mines Report

Production of coal in Alberta totalled 5,272,270 tons in 1921, says the report of the Provincial Coal Mines Branch given to the Legislature on Thursday. This was a decrease of 177,177 tons from 1920. The force now includes nine officers and 176 men.

The balance being shipped was 3,429,569 tons. A total of 3,429,569 tons was consumed in the Province, the balance being shipped was 3,429,569 tons.

The freight charges on the feed stuffs were increased by the railway company, and one-third each by the Dominion and provincial governments.

The total cost of the feed stuffs was 775,075 tons, the Drumheller being 192,425 tons, the Burgess being 475,075 tons, and the other being 107,575 tons.

The total cost of the feed stuffs was 775,075 tons, the Drumheller being 192,425 tons, the Burgess being 475,075 tons, and the other being 107,575 tons.

Penma Mental Hospital

The annual report of the Penma Mental Hospital shows that there were 444 male and 214 female patients there at the beginning of the year. There were 496 male and 289 female patients at the end of the year, there having been 276 admissions and 143 patients discharged during the year. The average yearly cost per bed is \$315.49.

The report of crop statistics is submitted by F. G. Foster, crop statistician, of the department. At the inflated prices of the late fall of 1921, the estimate of the value of the crop of the past year is placed at \$125,000,000. The various grain and other crops is shown as follows:

Wheat	4,020,000
Oats	2,130,000
Barley	525,000
Rye	135,000
Flax Seed	28,000
Mixed Grains	9,500
Peas	2,500
Potatoes	51,000
Furnish and other	8,200
Hay & Clover	454,000
Alfalfa	30,000
Fodder Corn	4,000
Grain Hay Green	1,133,000

J. D. Smith, Superintendent of the Seed and Weevil Branch reports on the difficulty in enforcing the Weevil Act which has been found to be practically impossible to spend much on destruction of weevils. He states that the difficulty is in the enforcement of the act.

Demand for seed grain during the year was much less than former years. The total distribution amounted to 35,000 bushels wheat, 44,000 bushels of barley, 15,000 bushels of oats, 15,000 bushels of rye, 15,000 bushels of flax, 15,000 bushels of mixed grains, 15,000 bushels of peas, 15,000 bushels of potatoes, 15,000 bushels of hay and clover, 15,000 bushels of alfalfa, 15,000 bushels of fodder corn, 15,000 bushels of grain hay green.

Reference to the unsatisfactory condition of the livestock industry in the province owing to lack of markets and depressed prices, is referred to in the report of the Livestock Commissioner, J. C. Carleton.

Mr. Carleton states there is a strong demand for good dairy cattle, but that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the sheep industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the pig industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the poultry industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the rabbit industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the bee industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the fish industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the game industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the fur industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the silk industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the wool industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the cotton industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the linen industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the paper industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the rubber industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the glass industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the metal industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

Referring to the wood industry, he states that the supply is not sufficient to meet the demand. He states that the supply is not sufficient to meet the demand.

LEGISLATIVE ACTS TO DATE

Most of the past week in the legislature has been spent in consideration of various bills in second reading and in committee of the whole. Several measures were advanced to their third reading, including the Highway Bill which provides for a highways commission. Mr. H. H. Hutton of the bill will become effective on administration January 1, 1922, but provision is made for the appointment of the commission in order that they might make plans for highway construction the coming summer. The bill will not have jurisdiction over cities. The bill to guarantee the bonds of the United States in the district, year, and section, for \$40,000, was passed. The bill to amend the Highway Act, to provide for the appointment of a labor commissioner, was passed also. Amendments to the division animals act were passed, including one providing against ranging of sheep in closed areas. The bill provided considerable relief in the house. These amendments were given second reading.

Bills reaching second reading this week included amendments to the bill to provide for the extension of the government brand shall not be evaded by the owner of the brand, by the owner of the brand.

Amendment to the agricultural society act, to provide for the extension of the government brand shall not be evaded by the owner of the brand, by the owner of the brand.

Hearth-Glow And Homespun

(By Polly Peck.)

Kitchen Lore.

Heater-by-the-Hour told me what an excellent thing a goldfish bowl was in which to ship cream and I have found that what she said is quite true. It keeps the liquid in the right form to surround the whippers and does not allow it to spatter.

A loaf of more or less paste bread can be made like new by placing it in a slow oven until heated through. If you bake your own bread you will find this suggestion, handed on to me by the Practical Person, a particularly useful one.

If a soup or custard curdles on the stove, the prompt and vigorous application of a Dover egg-beater will rectify matters.

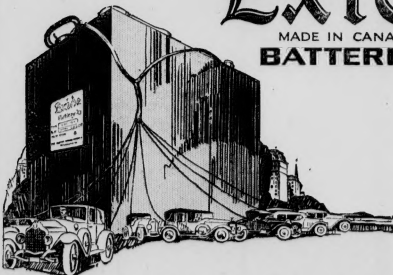

When making apple sauce, during the season when apples are fall-favorable and fine, I always make enough to put a jar away against the time when the fruit becomes scarce.

I have just discovered the value of

potato flour in making soup. Its thickening properties are great. A couple of tablespoons will thicken a quart of soup. I start my soup in a white sauce, melting the butter, but adding, instead of flour, potato flour, then milk. A little can of milk, too, added at the last minute enriches soups. I find, this will require careful seasoning or it will be flavorless. Salt, pepper, a little celery seed and onion juice are good, or, by the way of variety, a cupful of stirred cheese.

Apples, cut up for a salad, will keep their fresh whiteness if a little lemon juice is poured over them.

Exide BATTERIES

Only One Kind of Battery Economy

If ever there was a case of "penny wise, pound foolish," it was when a man goes price shopping for a battery.

There is only one way to economize on a battery for your car and that is by buying the best obtainable. The difference in original price between an Exide and the cheapest battery is nothing compared with what you save on the Exide in longer life and freedom from repairs.

You owe it to your temper and your pocketbook to have a rugged, long-lasting Exide in your car, and this is equally true whether you are buying a new car or replacing your present battery.

Insist on an Exide Battery. If you have any trouble in getting one write us or our nearest district distributor.

EXIDE BATTERIES OF CANADA, LIMITED
153 Dufferin Street, Toronto

THE LONG LIFE BATTERY FOR YOUR CAR

A little lemon is a grateful addition, too, to a dish of sliced bananas and saves the use of cream. The following recipe for a lemon sauce, served on bananas, has proved very popular in my household.

Take three tablespoons of lemon juice and one teaspoonful of the grated rind, one egg, three quarters of a cupful of sugar, one tablespoonful of flour, one cupful of hot water and a pinch of salt. Mix the flour with a little cold water, the lemon juice, rind, sugar, salt and the well-beaten egg. Add to the hot water and boil until thickens—about three minutes. Pour over the bananas while hot and serve to cook before serving. This quantity will be enough for six bananas.

Many people know the value of even a chicken substitute, but I wonder how many have tried pork in the same way. The tenderness of pork works in particularly well with chicken, and its presence can hardly be detected. Even by itself it will make a soufflé, most people, without question, and mixed with mushrooms or sweetbreads, it is equally delicious. The other day I served chicken (not to unexpected company). (And by the way, pate shells are very useful to have in the larder for such occasions. They will keep a long time, in tin boxes, and when freshened in the oven are as good as new.) To make a filling with what I had in the house was the question. There was a tin of chicken and the remains of roast of pork. These, cut in small pieces, I combined and served in my shells with a cream sauce. In the fall when we had mushrooms growing at our own back door, I used to cook cut up mushrooms in butter in the bottom of a double boiler, add flour and milk to make a sauce and serve in paste shells. These were very popular with my family and friends.

Art Touches For the Home

The gay touches of color, the bit of ornamentation here and there about the home are the things that make for its subtle attractiveness. It is to these little points artists turn most of their attention when the general furnishings have been disposed of.

Most women are afraid to use color about the house. This is perhaps because the proper use of color requires an artistic sense and more discernment than many can be brought to its misuse. The modern spirit in furnishing the bedroom is to avoid, as far as possible, the "set" of furniture idea. If we choose mahogany, it is well to combine it with a painted, oak or two, an old table or stool, a willow chair, to break the monotony of wood and give that delightful color touch which is so gay and inspiring.

Bedroom Color.

In a certain small girl's bedroom the window curtains were made of sheer rose silk to bring out the rose design of the rose paper, and the white enamel bed and dresser were relieved of their monotony and given that artistic touch that brought it from the stage of "ordinance" by stencilling motifs of flowers at intervals on the flat surfaces.

For the more bizarre effects, the simple background is excellent. There is a room in a modern apartment—twelve in mind, where window furniture in soft gray enamel is used. The rug is gray and the wall paper is gray also. But its monotony is admirably relieved by the touches of color given in scarlet, black, lake green and black, and wide, round cushions that find themselves here and there about the chairs. The centre table is of gray enamel with a glass top. Beneath the glass, a "wash of colorful cretine" is used to add the "touch of sympathy." Interior decorators claim no necessary to the artistic effect.

Wall lights may be stimulated in an old fashioned house without the necessity of wiring for electricity. Wall lights are used in modern homes for their artistic color effect rather than for the light they shed. So that they may be substituted where there is no electricity, by a pair of wall sconces in old brass, displaying several brilliant candles in rose, orange, violet, green or Chinese blue. An excellent rule is to choose some latent color in your floor rug and match the candles to that. In this way the harmony will result and the color note of the candles will bring out the latent design in the rug, making it appear newer and brighter.

Discipline at Home

(By Loretta C. Lynch.)

Do you have some system in your home? In all too many homes there is no semblance of discipline either for the children or the grown-ups.

With the beginning of another year, pause and think. Are you trying your children for the kind of a world they must live in? Are you trying to inculcate that spirit of helpfulness so that your children refuse to allow you to wash up the dishes after dinner in the evening just because you are their mother and they want you to have a much-needed rest? You can inculcate the proper respect for womanhood and the "older person" by explaining carefully to the child just what part the mother has played in the scheme of things.

Perhaps Robinson Crusoe could live without discipline, but just as he doubled up with Mr. Friday immediately he lost his right to consider no one but himself. Each man has certain duties which had to be performed in a certain way at a certain

time (in their case either night time or day time) so that both might profit. And just so, there must be a division of duties in the home, and some one must maintain sufficient discipline to see to it that the duties are performed.

If Willie had been assigned the task between 7 and 7:30 as his opportunity in the bathroom and he does not avail himself of that time for one reason or another, he should be made to wait until the others have used the bathroom in their turn. This will teach Willie the value of promptness and also he will learn consideration for those he must live with.

Every mother or head of a family should sit down and formulate some plan whereby the members of the family will have certain duties to perform, a definite time for bathing, playing, eating, looking over the wardrobe at the clothes. Every mother owes this kind of training to her children even if there is a servant or maid-of-all-work in the family. She particularly owes it to them if she, herself, must do all the work.

Deprive the little boy who is habitually late for meals of one or two meals or of a trip to the "movies" when his favorite is there and you will have taught him promptness, consideration for the mother who is a diligent effort the real representative, consideration for the folks he must eat with, and you shall have also been training in discipline—that training necessary to every successful life.

For The Children

DOCTOR DORMOUSE AND HIS PATIENTS.

Copyright by British and Colonial Press, Limited.

"And no wonder," said Doctor Dormouse, "you've been eating eggs to your death. Remember Master Waddles, whenever you see a raven's head that tongue of yours to yourself and you'll be all right in a week."

The load opened his mouth to say something but Doctor Dormouse kept on talking "but the raven will be two blue bottle flies," but the load had only one blue bottle fly which he gave to the Dormouse, together with a tiny juniper caterpillar.

The Dormouse shut the caterpillar and the blue bottle in a pill box which he slipped into his satchel and with a warning shake of his paw at the load said:

"Remember, no sand flies for a week. Master Warty Waddles."

After Dick and the Dormouse had said some distant words, Doctor plaid his hat on the ground and called loudly:

"It's the Doctor. Come down stairs."

There was a flapping of wings and a large raven alighted close by the Dormouse who was now sitting on his

NOTICE OF SALE.

PURSUANT to the Order of His Honour Judge J. A. Jackson, made herein the 24th day of October, A.D. 1921, in a certain action wherein the TRUST AND LOAN COMPANY OF CANADA is Plaintiff, and GEORGE W. O'REILLY, THOMAS DOUGLAS, and EMILY MARY GOESON are Defendants, the following lands situate in the Province of Alberta, and described as: North East Quarter of Section 18, Township 16, Range 26 West of the 4th Meridian, excepting thereout 6.12 acres more or less for right of way and also excepting the surveyed public road 1/4 chain in width and reserving unto His Majesty all mines and minerals, will be offered for sale by Public Auction on

Wednesday, the 15th day of March, 1922.

At the hour of 12:30 o'clock in the afternoon, at the Court House, in the Town of Macleod.

The sale will be subject to a reservation to be fixed by the Court. Terms and conditions will be made known at the time of the sale or can be ascertained from the undersigned solicitors.

The said land is situated about four miles of the village of Granum, and said land there is said to be a dwelling house, garage, stable and pump house and good well. About 1/4 chain of the said land is under cultivation. The said land is said to be fenced.

Dated at the City of Lethbridge in the Province of Alberta, this 13th day of February, A.D. 1922.

CONYBEARE, CHURCH & BARRISTERS AND SOLICITORS, Block, Lethbridge, Alberta. GEORGE F. PORTER, Auctioneer. 11-3

bat. "And what seems to be the trouble?" roared the Dormouse.

"I'm hoarse as a crow," replied the raven in a harsh voice. Dick laughed, "but you're always that way, aren't you?"

The raven ruffled up his feathers and cracked angrily.

"There is really something the matter with my throat."

"Perhaps there's a frog in it," suggested Dick, smiling.

"Sticking of the sort," began the raven.

"Open your mouth and don't talk as hoarse, Master Blackie Longbill," interrupted the Dormouse.

The raven came close to the Doctor, closed his eyes and opened his beak as widely as he could.

Leaving the blackbird standing gaping, the Dormouse disappeared in the underbrush. He was not long gone and seating himself on his hat again he quickly expressed the juice from a thick green leaf right in the raven's throat.

Blackie Longbill, the raven, coughed, gasped, the tears streamed from his eyes but he couldn't say a word.

"Your voice needs a 'noting,' said the Dormouse cheerfully. "Nothing like silence for a moment. Whenever you feel a lot of talk coming on just squeeze one of these pepperment leaves in the back of your throat."

The Doctor put on his hat and continued:

"My fee will be two sparrow eggs."

But the raven had only one sparrow egg which was a broken one. The sides that he had to pay the Dormouse seven June bugs which he borrowed from the Dormouse.

After the Dormouse had stowed away the June bug in his satchel he walked over to a large tree and sat down.

"You might just as well sit down,"

"You can't feel good but when you make you feel better."

(To be continued.)

ABOUT POETRY

Her hair is like the floss of raveled gold."
I wrote, and felt a pleasure in the line;
What though the simile was worn and old—
Was it not new to me, and therefore fine?
Here eyes were violets to me, her brow
A lily, and her cheeks were roses red;
I would not use such ancient figures now—
But now, my love is dead!
The sky was like a meadow, and the clouds
Were fleecy sheep that roamed about the same;
Such notions came across my mind in crowds,
And kindled Inspiration's sacred flame;
Today I put such moss-grown tropes away
With smiles of scorn. But all that was no fair

You would think spring is coming if you saw the consignment of summer underwear, in ladies' children's and men's, just arrived for us. It is a large and comprehensive shipment—the prices are right—having been bought before the late rise in cotton. The women's combinations and vests without sleeves, having a silk strap instead and with fancy open work, are very pleasing to the eye. An one lady said, the vests are so cute I can wear one instead of a waist or blouse. Then the bloomers are very attractive drawn in at the knee with fancy colored ribbon. It certainly is pleasing—also having the appearance of a cross between a bathing suit and bloomer. It is only occasionally that there are new views to the public. The only time you may catch a glimpse of them is when the wind is in a playful mood and exceptionally boisterous in blowing the outside garments inside out so that the naughty male can see and behold the mysteries of woman with the fancy articles new on the market. He stands perturbed with admiration and wonder. The combinations in knee line or knee and ankle length are nice, of good quality and come within the reach of all. We also have a large and varied stock of flattery with more lines to come. In shoes, Orders seem to hold the fashion, the dressy, and with a nice shaped stocking, it is most pleasing to the eye. We have them in lace and black in Good Year style—the sole is as feasible as a glove. By the way, why is the human hand never larger than (11) eleven inches? Answer—because if it was larger it would become a foot. Spring is still playing peek-a-bo with us at time of writing. A shipment of white footwear has just come in—ladies' Canvas Pump Oxford, Mary-Jane and Canvas High-Top.

J. W. MOREASH, MERCHANT TAILOR
CLEANING DYEING PRESSING

LOCAL AND PERSONAL NEWS

Mr. W. Hale returned last week from a visit to B. C. points.

A herd of antelope about twenty in number was seen near Hillcrest lately.

Rabbits are said to be very plentiful in the neighborhood of Orion.

The public trails in the neighborhood of Macleod are in first rate condition for vehicular traffic.

Many people are suffering from sore throats and severe colds. The disease is in a form of grippe and is prevalent all over the west.

Mr. J. W. Moreash, who was threatened with an attack of pneumonia, is now on the mend we are pleased to learn.

The members of the Alberta police are getting to be a little more than they can invest their spare change in a 1922 license plate.

Mr. Arthur White who has spent the month in and around the city of Calgary returned to Macleod last week.

The present winter is claimed by all to have been unusually severe. The heaviest amongst cattle, however, have been very light.

The Farm Women's ladies aid of Rathwell did not meet last week owing to stormy weather. This week they met, however, at the home of Mrs. J. Horner.

The weather during the early part of the week was cold, clear and calm, with clear cold nights. Wednesday the weather turned milder, being light, so wind, snow melting rapidly.

Over four hundred people living in Canada died from cancer last year, the startling statement recently made by the bureau of statistics, a department which is supposed to know where it speaks.

The first session of the 1922 Criminal Court will be held on Monday, March 13th, at the 2nd inst., as was stated last week. There will be a fairly heavy debt. Justice lives will preside.

The U.F.A. Co-operative Store Co. at their regular meeting held on the 18th ult., accepted the resignation of their manager, H. H. Helson, and appointed in his place S. G. Gillespie who took office on the 1st of the present month.

At the last regular meeting of the lodge of Oddfellows, the third degree was conferred upon two candidates, after which refreshments were served, followed by a little singing, with Mrs. Hartley at the piano. Bro. Rowden, on the bands, was very successful in several songs rendered by other members. All in all a very enjoyable meeting was held.

James Audette and Albert Vail who were tried on Wednesday before His Honor Judge Macdonald, on charges of the theft of two coats, one of them a Black from Anderson, on November 25th last, and a Saxon, from Wesley Reid of Claresholm. This latter case was brought back from Montana in December last when the two accused were captured. They were defended by H. S. Ostlund of Lethbridge; Mr. W. McDonald, K.C., prosecuting. They were both found guilty on both charges.

How to get 25,000,000 acres more land under the plough in the United States is the problem that is troubling those who are concerned with preparations for an expected population of 150,000,000 in 1950. Only one-quarter of the land area is now cultivated, but only a part of that remaining is arable land. There is nothing to worry about friends. Canada has millions of acres of arable land awaiting the new comer and at the present moment it is being taken up at a rapid rate by incoming Americans, the trend northward having as yet scarcely started.

Meetings of special interest to the farming classes are being conducted at various points in the province at the present time. Live speakers are being employed to address these meetings and much valuable information is being given. There will be two meetings held in Macleod on the 2nd and 4th inst., Friday and Saturday this week. They will be addressed by the following speakers: Messrs. Fairbairn, Murray, Eisenhauer, Freng, and Matthews. The subjects will be soil cultivation, crop pests, live stock and irrigation. In the evening moving pictures will be shown on the screen. All four topics are attracting the attention of farmers at the present time, and there will doubtless be a good turnout to greet the lecturers upon their arrival here. The general public is cordially invited to attend the meetings.

Married at Cutts, on Tuesday, February 21st, Mrs. M. F. Long, daughter of Mrs. L. Schorr, of Macleod, to Mr. Arthur V. Nash, of Milk River by the Rev. Father Rodan.

Mr. and Mrs. Ferguson, C. W. E. Gaudin and C. M. O'Brien attended the meeting of the Synod of the Church of England held in Calgary last week.

The schools were closed on the 1st inst., it being Ash Wednesday. We haven't heard of any complaints being registered by the children in the closing of the schools on that date.

Mr. H. S. Goetz, late of the Imperial Oil Company, at Macleod, has been transferred to the Medicine Hat branch of the above company and left to assume his new position on Tuesday last.

A mentally unbalanced woman living in this vicinity was removed to the Penokins insane asylum the latter part of the week. Five small children are left and these are being looked after by sympathetic neighbors.

Mr. R. J. Hutchings of the Great West Sundry Company was in Macleod last week. The present season does not depress Mr. Hutchings who figures that with the coming of spring Macleod will be one of the best places on the map.

Money stolen from a New Westminster (B.C.) branch of the Bank of Montreal some seventeen years ago is still turning up at odd times. Recently a package containing a large amount was received at the Calgary branch, coming from across the river. The British Columbia bank was stung to the tune of nearly \$100,000.

A letter written by Mr. M. R. Freng, government relief agent, was received by Mr. H. W. Bright, stating that a government relief agent will be at his office on Monday, March 20th, to receive applications for aid from the settlers of the Macleod, March and Pine Hills districts. Hay, groceries and food to bona fide farmers under government regulations will be issued.

Mr. C. Brunner, a sheep herder for the Knight-Watson Ranching Company got caught in a blizzard with his band of sheep and was out in 20 below zero weather for 36 hours before being rescued. At that time he was without food or sleep. Both hands and feet are severely frost-bitten and several fingers are said to be amputated. It was an experience very few people would live through.

Mr. and Mrs. H. Little entertained at the family residence on Wednesday evening of this week, the occasion being the 21st and wedding anniversary. Cards and music occupied the party pleasantly and a dainty lunch was served by the hostess. The guests were: Mr. and Mrs. J. A. Struthers, Mr. and Mrs. R. McGee, Mr. and Mrs. W. McCall, Mr. and Mrs. McFarquhar and Mrs. T. S. McLean.

The Canine Challenge Cup will return to Macleod this week. The trial tried hard to lift it but was against them from the start. On Monday two sticks of seal carter went down to the coal town to try their luck, but were defeated by a total of eleven points. The game was a battle royal and is said to have been well worth watching. The Macleod players were Messrs. W. H. Day, J. Prince, G. Stewart, D. G. Mackenzie, W. Stewart, A. Dunn, Dr. Kennedy and O. Stewart.

The game was a battle royal and is said to have been well worth watching. The Macleod players were Messrs. W. H. Day, J. Prince, G. Stewart, D. G. Mackenzie, W. Stewart, A. Dunn, Dr. Kennedy and O. Stewart.

How to get 25,000,000 acres more land under the plough in the United States is the problem that is troubling those who are concerned with preparations for an expected population of 150,000,000 in 1950. Only one-quarter of the land area is now cultivated, but only a part of that remaining is arable land. There is nothing to worry about friends. Canada has millions of acres of arable land awaiting the new comer and at the present moment it is being taken up at a rapid rate by incoming Americans, the trend northward having as yet scarcely started.

Meetings of special interest to the farming classes are being conducted at various points in the province at the present time. Live speakers are being employed to address these meetings and much valuable information is being given. There will be two meetings held in Macleod on the 2nd and 4th inst., Friday and Saturday this week. They will be addressed by the following speakers: Messrs. Fairbairn, Murray, Eisenhauer, Freng, and Matthews. The subjects will be soil cultivation, crop pests, live stock and irrigation. In the evening moving pictures will be shown on the screen. All four topics are attracting the attention of farmers at the present time, and there will doubtless be a good turnout to greet the lecturers upon their arrival here. The general public is cordially invited to attend the meetings.

Marriage of Princess Mary

LONDON, Feb. 28.—Princess Mary only daughter of King George and Queen Mary, was married today to Viscount Lascelles, with all the pomp and dignity befitting a royal wedding.

The scene of the ceremony within the historic walls of the abbey was one of impressive grandeur, with the king and queen and the entire royal household participating. Hundreds of Americans made the Atlantic voyage to gain a view of the great state function. The conveyances put down at the abbey doors streams of gorgeously-crowded women, myriads of diamonds, sapphires and other precious stones flashing from their tresses, necklaces and brooches. There were also in service dress or the dress of bridesmaids, white silk and tulle and three-cornered hats of court regular. It was a procession of beauty and elegance.

The wedding breakfast was served to a company of about 170 persons, including the royal family and relatives and closest friends. A feature of this was the cutting of the 400 pound wedding cake made in five tiers, standing nearly seven feet in height, the ingredients of which were sent especially from the various parts of the British Empire.

A storm of cheering outside proclaimed the arrival of the bride and the king. Mary stepped from the altar—only a princess in her fairy tale gown, combining the sheen of silver, the filmy down of tulle, the sparkle of beads, the dull sheen of pearls and the exquisite colorings of satin and old lace, against which contrasted the wonderful four and a half yard train with its silk embroidery and crystal work.

The pearl-encrusted veil, thrown back from her face over a triple diadem of twisted silver and orange blossoms, revealed the demure features of the princess.

On her drive from the palace the bride gown had been cloaked in a rich ermine wrap.

The dean received the party. "Lead us, heavenly father," was played as the bridal procession moved up the nave headed by household officials, the state churchmen, the dean, canons and choir, the latter comprising 44 boys and 22 men. Then came the bride on the king's arm, followed by the bridesmaids, the ladies in wait-

ing and the king's suite.

It was about 11:30 when the solemn service, performed by the Archbishop of Canterbury, assisted by the Archbishop of York and the dean and precentor of the abbey, began.

The sixty-seventh Psalm was chanted and the anthem "Beloved, Let us Love One Another," was sung during the service. During the ceremony the bride carried an exquisite hand service, a gift from the queen.

The dean of Westminster read them and to the strains of Sir Hubert Parry's bridal march, faintly heard from the interior of the abbey, they were conducted by gentlemen who were down the aisle and around the unknown warrior's grave, between rows of guests standing in phalanxes, tier above tier, on either side, to their places in the sanctuary.

The officiating clergyman were the Archbishops of Canterbury and York, the Bishops of London and Oxford and Canon Maurice Lascelles, the bridegroom's uncle.

At the completion of the ceremony the bride and groom then passed to the altar.
